

Dataset & Link Github

[Dataset: Life Expectancy \(WHO\) Fixed](#)

Link Github: [githttps://github.com/Shinoaki0145/Life_Expectancy_WHO](https://github.com/Shinoaki0145/Life_Expectancy_WHO)

Mission

Task	Who	Deadline	Status: Not working In progress Done
What subject is your data about? • Describe the topic, domain, or phenomenon • What real-world context does this represent?	Đạt	22h 26/11	Done
What is the source of your data? • Platform name (Kaggle, UCI, etc.) and full URL • Original author(s) or organization • Publication/collect ion date	Đạt	22h 26/11	Done
Do authors of this data allow you to use like this? You can check the data license • What license does the dataset have? • Are you permitted to use it for educational purposes? • Document any usage restrictions or attribution requirements	Đạt	22h 26/11	Done

How did authors collect data? • Collection method (survey, sensors, administrative records, web scraping, etc.) • Target population and sampling approach • Time period of data collection • Any known limitations or biases in collection	Đạt	22h 26/11	Done
Why did you choose this dataset? • What interests your group about this topic? • What potential questions or insights could this data provide?	Đạt	22h 26/11	Done
Exploring data (often interleaved with preprocessing)	Việt	22h 26/11	Done
Make skeleton for Jupyter Notebook	Nhân	22h 26/11	Done
Meaningful questions 1 - Include at least 1 question that requires building and evaluating a machine learning model to solve	Nhân	15h 7/12	In progress
Meaningful questions 2	Nhân	15h 7/12	In progress

Meaningful questions 3	Đạt	15h 7/12	In progress
Meaningful questions 4	Đạt	15h 7/12	In progress
Meaningful questions 5 - Include at least 1 question that requires building and evaluating a machine learning model to solve	Việt	15h 7/12	In progress
Meaningful questions 6	Việt	15h 7/12	In progress

Individual Reflections Each group member should write a personal reflection covering: Challenges & Difficulties Encountered: • What specific obstacles did you face? (technical, analytical, conceptual) • How did you overcome them? • What was most challenging and why? Learning & Growth: • What have you learned? (technical skills, analytical approaches, domain knowledge) • What surprised you most? • How has this project shaped your understanding of data science?	Nhân, Đạt, Việt	22h 12/12	Not working
Merge code	Nhân	22h 10/12	

Future Directions (If You Had More Time) • What additional questions would you explore? • What deeper analysis would you conduct? • What alternative methods or approaches would you try? • What additional data would you seek? • How could this work be expanded or improved?	Đạt	22h 12/12	Not working
Limitations: • Dataset limitations (sample size, biases, missing data) • Analysis limitations (methodology constraints, unanswered aspects) • Scope limitations (what you couldn't address)	Việt	22h 12/12	Not working
To finish this project, what materials have you consulted?	Việt	22h 12/12	Not working

Team Plan and Work Distribution • Team member information • Work breakdown by member (tasks, contributions, percentage) • Collaboration process description • Project planning and timeline	Nhân	22h 12/12	In progress
README File (README.md) • Project overview and team inf • Dataset source and description • Research questions list • Key findings summary • File structure explanation (if multiple notebooks) • How to run instructions • Dependencies list	Việt	22h 15/12	Not working

Hop

- Scrum 1 khi bắt đầu làm $\Rightarrow$ 22h 26/11
 - Làm xong tasks được giao, rồi họp để mọi người reviews và bàn về tasks tiếp theo
- Scrum 2 0h 27/11 $\Rightarrow$ 15h 7/12
 - Review chi tiết, các câu hỏi mà các thành viên đặt ra. Chuẩn bị các công việc cần thiết cho các tasks cuối cùng.
- Scrum 3 17h 7/12 $\Rightarrow$ 22h 10/12
 -
